Behavioural assessment summary

Analysis computed Apr 19, 2026

[Re-analyse](#)

ROLE-FIT READ

Mixed fit

OVERALL CONFIDENCE

Moderate signal — partial convergence

Four behavioural items scored with partial convergence; honesty-humility reaches moderate confidence while conscientiousness, learning, and interpersonal dimensions each carry limited signal, leaving the overall picture only partially formed.

The candidate's preference for predictability and answers that stay at a surface level suggest they may struggle with the ambiguity and rapid pivoting that marketing engineering regularly demands, even though their steady approach to learning and follow-through would serve the more structured execution side of the work.

This is a summary of observed signal against the hiring frame for this role. It is not a hire/no-hire recommendation — an interview is required to make that call.

PATTERNS AND CONCERNS

Behavioural responses consistently lack specificity

Across 2 behavioural items, the candidate gave abstract or generic descriptions rather than concrete, specific accounts. Could indicate weak self-reflection, low agency in the situations described, or a preparation issue. Probe with targeted "tell me exactly what you did next" questions.

Referenced: Part 1 — A recent piece of work, Part 5 — Changing your mind

SUGGESTED PROBE [Regenerate](#)

"You mentioned the video element was cut and the committee was told it was for timing reasons — what exactly did you tell them, and how much did they know about the last-minute cancellation?"

Stability ranked high for a high-ambiguity role

Candidate ranked stability as a top-1 motivator. This role involves high ambiguity and self-direction. Worth testing whether the candidate has had successful experience in less structured environments.

Referenced: Motivation trade-off ranking

SUGGESTED PROBE [Regenerate](#)

"You ranked stability as your top motivator, and this role sits in pretty ambiguous territory — priorities shift, the roadmap changes, and there's not always a clear playbook. What does stability actually mean to you in practice, and how have you made that work in situations where the ground was moving under you?"

STRENGTHS

- ✓ When a filming commitment fell through at short notice (Part 1), the candidate adjusted the campaign content and kept the committee informed, pointing to reliable follow-through under real deadline pressure.
- ✓ In Part 5, the candidate recalled resisting peer feedback on colour choices before acting on it and later recognising the revised version was better, suggesting they can update their views when direct evidence overrides initial attachment.

INTERVIEW FOCUS

1. *"You mentioned the wrong mailing list email "wasn't a major issue" — can you tell me more about what the confusion actually looked like on the receiving end, and whether there was anyone who didn't find it as easy to move past as you did?"*
2. *"You mentioned the video element was cut and the committee was told it was for timing reasons — what exactly did you tell them, and how much did they*

know about the last-minute cancellation?"

3. *"You ranked stability as your top motivator, and this role sits in pretty ambiguous territory — priorities shift, the roadmap changes, and there's not always a clear playbook. What does stability actually mean to you in practice, and how have you made that work in situations where the ground was moving under you?"*

Ranked by signal priority — high-severity flags first, then downgraded dimensions.

DIMENSION ESTIMATES

Conscientiousness

Moderate positive sig

FORCED-CHOICE PROFILE

Strongest preference toward Interpersonal Style and Conscientiousness. with Learning Orientation as a secondary signal. Lower or no signal on Composure.

► Scoring detail — for auditing ▼

MOTIVATIONAL PRIORITIES

Stability and Autonomy rank highest. Mission ranks last of four.

For a high-ambiguity, self-directed role, stability ranking 1 of 4 is worth testing in interview.

INTEGRITY SCENARIO (C-T 2)

Option B: Delay the meeting, take the week to fix it, and share the corrected version.

This report is a structured summary of a short assessment. It is not a psychological evaluation. Use alongside, not in place of, interviews and work samples.

Background

COVER LETTER

I am very interested in the Marketing Engineer role at YFS. I have a background in marketing and communications and have used various digital tools in my studies and work. I enjoy creative projects and am comfortable with technology. I am keen to develop my skills further in a role that combines marketing and technology.

Role-specific answers

Marketing Engineer

QUESTION 1

Describe a creative project you have worked on — personal, academic, or professional — that you are genuinely proud of. What made it stand out and what did you build or create?

I am proud of a campaign I helped run for my university's student union social media. We created a series of posts about student wellbeing and it performed quite well. I designed the graphics using Canva and wrote most of the copy. We got some good engagement and the posts were shared more than usual. I think what made it work was that the topic was something students genuinely cared about.

QUESTION 2

Tell us about an AI tool, automation, or script you have built or used in your own life or studies. What did it do, how did you build or set it up, and what problem did it solve?

I have used tools like Buffer for scheduling social media posts and I have experimented with ChatGPT for writing first drafts. I have also used Canva's AI features to generate background images. These have saved me some time in my workflow. I haven't built anything from scratch but I am comfortable adopting new tools when I need them.

QUESTION 3

How do you think AI is changing marketing over the next two to three years? How are you personally preparing for that shift, and what have you already experimented with?

AI is clearly going to be very important in marketing. I think it will help with things like content creation and personalisation. I have been reading articles about how brands are using AI and I am keeping an eye on how

things develop. I plan to learn more about specific AI tools over the coming months.

QUESTION 4

If you had to launch a marketing campaign for YFS with a £500 budget, one week of your own time, and no team, what would you actually do? Be as specific as possible.

With £500 and one week I would focus on social media, probably Instagram and LinkedIn. I would create a series of posts that showcase what YFS does and the impact it has had on students. I would use a mix of graphics and some video content. I might put some of the budget behind a boosted post targeting the right audience. I would track engagement to see what was working.

QUESTION 5

Describe something you have taught yourself outside of school or university in the last two years. Why did you pursue it, how did you go about it, and what did you produce or achieve as a result?

Over the last year I have been improving my skills in graphic design using Canva and learning more about SEO. I worked through some online modules and applied what I learned to some projects for my university. I enjoy learning new things when they are relevant to work I am doing.

Standard questions

Q1

Tell us about a time you identified a problem no one else had noticed and took initiative to solve it. What did you do and what happened?

I noticed that my course's group chat was getting too busy and people were missing important information. I suggested we create a separate channel for announcements and people agreed. It made things a bit clearer for everyone.

Q2

Describe a project or goal you worked on that did not go as planned. How did you respond and what did you learn?

I worked on a group project that didn't go as well as expected. We struggled with coordination and the final output wasn't as polished as it could have been. I learned that planning communication better at the start of a project is really important.

Q3

What is one skill or area of knowledge you have taught yourself in the past two years? Why did you pursue it and how did you go about it?

I have been teaching myself more about email marketing through online courses and tutorials. I find it interesting and relevant to my career goals. I completed a Google certificate in digital marketing which covered a range of useful topics.

Q4

Describe a situation where you disagreed with someone more senior than you. How did you handle it and what was the outcome?

There was a situation where I thought a project should go in a different direction to what my tutor suggested. I raised it in the feedback session and explained my thinking. My tutor listened but we proceeded with their recommendation. I accepted that and tried to make the approach work as well as I could.

Q5

What is the most ambitious thing you have attempted, regardless of whether it succeeded? What drove you to try it?

I think the most ambitious thing I have attempted is applying for competitive internships and continuing to work on my skills even when I didn't get through. I kept going and eventually got some good experience. I believe persistence is important.

Q6

Where do you want to be in five years, and how does this role connect to that path?

In five years I would like to be working in a marketing role in an organisation doing something meaningful. I want to keep developing my skills in digital and content marketing. This role at YFS would be a great starting point for that journey.

Final reflection

I am excited about this opportunity and believe I have the skills and enthusiasm to contribute to YFS. I am keen to learn and
